VOLUME ONE — SEASON ONE

WINTER / SUMMER LOOKBOOK — OUTDOOR URBAN MEETS THE OUTDOOR

THE KIT

The box logo patch never changes structure — rounded rectangle, stitched border, four-blade pinwheel, italic bold color-split lettering. Only the colorway rotates: 41 in the current series, the camo family included. The earned patch stack rides on the vests and work shirts. Box logo only — that is the whole system.

THE MARK — MASTER

THE MARK — CAMO

THE EARNED STACK

Grade patches, rockers and name tapes — worn on the vests in W5, W6, S5 and S7.

THE CREW

OUTDOOR URBAN MEETS THE OUTDOOR

The models are the instructors. Not stock models — us. Every look in this book is worn by the people who teach the course, led by Chase LeDeatte, founder and lead instructor, face and name on the work. The scenery is the job: the weird, remote places this work sends a crew.

Fully trained in Doodle Labs configuration and completely knowledgeable in Silvus Technologies configuration.

ON DUTY — IN GEAR

On base, on call, on the flight line, working with cohorts. Camo and work vests, the earned stack on the chest, the Boxer in hand — the merch worn the way it is actually worn out there: as issued work kit, in real deployment settings, in the woods, fields and lake edges where the flying happens.

AFTERWARDS — URBAN MEETS THE OUTDOOR

Then the weekend strands you, and the gear comes to town. The same instructors off the clock in whatever town the job stuck them in — a beer at some random spot, odd little places in the middle of nowhere. The outdoor pieces live an urban after-hours life: a white tee, a black hat, shorts, the same kit worn easy. Real, lived-in, a little funny — not a polished city shoot.

BOX LOGO ONLY — ON DUTY AND OFF.

THE EYES

The goggles on the student kit list — the actual product, exactly as it ships.

HDZERO GOGGLE 2 — RED · ECHO ANTENNA KIT

Two patch antennas on angled rail mounts, two red RHCP omni stubs — exactly four antennas, exactly the kit. 1080p 90Hz OLED, built-in analog receiver, onboard DVR.

Product photography: HDZero (hdzero.us) — the real goggles, the real antennas.

THE ECHO KIT — AS SOLD

Winter runs heavy: camo jackets and vests, hoodies, beanies, the earned stack on work shirts. Summer runs light: the same patch system on tees, vests, work shirts and camo shorts — shot in the woods, fields and lake edges, not the studio.

THE MODELS ARE THE INSTRUCTORS. THE SCENERY IS THE JOB.

THE MARK NEVER CHANGES; THE SEASON DOES.
